SELECT CIVIL

WASTE MANAGEMENT AND LANDFILL SERVICES

A key component in Select Civil's structure is our Waste Management & Landfill Services division. Select currently operate 6 long term Landfill Services contracts in Sydney (Lucas Heights & Elizabeth Drive Waste Facilities), Raymond Terrace (Newline Road Waste Facility), Melbourne (Hallam Road Landfill), Perth [North Bannister Resource Recovery Park] and Mackay (Hogan's Pocket Landfill) these sites current monthly combined tonnage of waste is excess of 300,000 tonnes per month often in difficult & challenging weather & conditions. In addition to the placement of waste at the sites Select also carry out associated services such as;

- Cell excavation & construction work, dry and wet plant hire, materials handling and site maintenance.
- Engineered Cell Capping.
- Gas & Leachate Infrastructure Works
- Landfill Infrastructure works.

Select employ in excess of 70 staff at the sites [inclusive of 2 Regional Managers, 7 Site Managers, 7 Site Foremen & 15 Heavy Plant Fitters] to carry out the site operations & to maintain the plant to the standard required to perform these operations.

In addition to the provision of services to the sites Select also provide long and short term Dry hire of landfill plant & equipment to numerous local Councils & other Waste management companies including local councils such as Singleton & Wollongong Councils. Our clients appreciate Select's ability to supply back up support & equipment for the plant that operate in a very harsh environment.

SELECT CIVIL

Landfill Operational Services

Select Civil specialise in the provision of long term Landfill Operational Services. We manage the on ground operations on 6 large to medium landfill sites around Australia landfilling over 3 million tonnes of waste per annum.

As part of our landfill services infrastructure Select operate an accredited equipment workshop at our head office along with full maintenance workshops on each landfill site.

Case Study

Lucas Heights Resource Recovery Centre

The Lucas heights resources recovery centre is a 125Ha site and is licensed to accept 550,000T per year of Solid Putrescible and non-putrescible waste including C&I and C&D waste. 50, 000T per year of Green Waste to Cleanaway Organics Composting platform.

Select is currently contracted to provide landfill services at the site, these services include a public drop off and resources recovery transfer station, tip face operations, stormwater & leachate management, maintenance of access roads & litter control. In addition to these services for the environmental solutions Select also provide Dry Hire Plant to Cleanaway including 1 x 950H Loader and maintenance for the green waste platform.

WASTE & RECYCLING PLANT AND EQUIPMENT HIRE

Waste & Recycling Plant

Select Civil own and maintain a large fleet of Waste handling equipment targeting the Waste and Recycling industry. Our fleet of specialist Waste Compactors, Dozers and Excavators are to be found on a number of landfills and transfer stations throughout NSW. Select's ability and experience in the provision and handling of waste on site provides us the experience & knowledge to assist the client in their operations providing additional added value to the equipment hire.

Select service a number of both Private and Government entities with hire equipment for medium to long term hire. Our equipment is utilised on landfill's, in waste transfer stations and in numerous recycling facilities. Our large fleet of specialised equipment allows us not only to provide the equipment under the contract, but to back up the provision of that equipment with equipment from our fleet should there be any significant down time.

The focus of Select Civil is to provide the client with the appropriate plant for the task along with the behind the scenes back-up and support to ensure the client has maximum efficiency with minimum downtime.

WASTE EQUIPMENT REBUILDS

Waste Plant Refurbishment

To run efficient and cost effective waste facilities it is essential that the equipment used in the facilities is maintained in good condition. Typically, the lifespan of an item of equipment ranges between 10,000 to 15,000 hours [depending on usage] before major components start to fail causing considerable downtime and lost efficiencies. Replacement of these machines, especially in recent years involves a large investment when realistically the core components of the equipment such as the chassis are good for 3 to 4 times the machine components.

For Clients who choose to run and maintain their own equipment Select offer the much more cost effective option of refurbishing the client's equipment. This refurbishment is tailored to the needs of the client and may range from a basic engine and drive chain overhaul to a full in-house rebuild from the chassis up.

These refurbishments offer a large cost saving over the purchase price of new equipment whilst facilitating a 2nd life of operation to the client. In addition to ensure the client does not incur downtime Select can facilitate the hire of replacement equipment from our fleet of dedicated waste machines.

OUR PLANT HIRE AND WASTE MANAGEMENT SERVICES TEAM

RENAUD CHAUVET – MANAGING DIRECTOR

17 years in business subsidiary management, Renaud holds an MBA in International Management and a Masters of Management in Corporate Finance from the University of Dallas, Texas. Previous long-term experience in West Africa in Plant & Equipment distribution and timber industry. Renaud has been with Select Civil for 13 years.

GRAHAM PEACE – GENERAL MANAGER

18 years working in civil and construction projects management, including the construction of sewerage pump stations, bulk excavation & soil treatment projects, mine rehabilitation projects, waste and waste cell construction, bridge construction and roadworks. Graham successfully managed projects in Australia, South Africa and England.

PETER 'WIZZ' WISNIEWSKI – ASSET MANAGER

Peter has extensive knowledge of plant and equipment on major road, rail, mine and waste water development projects. His long operational experience of earthworks makes him an invaluable and respected asset to our estimators and foremen. It is this experience that our wet hire clients recognise when hiring equipment from Select Civil. Peter has been with Select Civil for 15 years.

DYLAN JULIUS – OPERATIONS MANAGER

Dylan began with Select Civil in 2005 as a skilled plant operator. His work ethic, experience on large commercial and industrial construction projects and ability to work with our team has seen him become a highly thought of member of the team. Dylan has progressed in Select Civil and has now expanded in his role to oversee all of Select Civil's NSW, W.A and QLD based projects and assisting other landfill supervisors in the progressive improvements to their operations.

PETER BILL – MAINTENANCE MANAGER

Peter is a qualified heavy plant mechanic who together with his crew takes great pride in the high level of safety and plant availability he maintains for our fleet. He has over 30 years' experience working with heavy plant in mining, construction, Road Haulage and the waste industry. Since Peter's arrival at Select Civil in 2014 he has been an integral part of the maintenance team supervising our numerous workshop and mobile teams of plant mechanics. Peter takes pride his customer service and ensuring equipment has a high level of availability in a very harsh industry.
