ABOUT US

Established in 1987, Select Civil is a leading provider of civil contracting, plant hire, and waste management services across Australia. We can deliver any type of civil construction project, and specialise in complex civil projects, including road and bridge construction, stormwater drainage, landfill cell development, and mine remediation.

Our experienced construction team is made up of Civil Engineers, experienced supervisors, foremen, plumbers, builders and a well established plant operator and labour group. Our tried and proven approach is to work collaboratively with both our Clients and subcontractors to deliver all project outcomes safely, efficiently and to the satisfaction of our customers and stakeholders.

As part of larger parent company Groupe Poisson since 2001, we leverage international expertise to deliver innovative, sustainable solutions. Our commitment to quality, safety, and environmental responsibility is backed by ISO 9001, ISO 14001, and ISO 45001 certifications.

At Select Civil, we prioritise safety, sustainability, and strong client partnerships, delivering reliable solutions that meet the highest industry standards.

CERTIFICATIONS

- ◆ ISO 45001: Occupational Health & Safety
- ◆ ISO 9001: Quality Management
- ◆ ISO 14001: Environmental Management
- ◆ TfNSW R2/B1/F15 Certification

KEY CLIENTS & INDUSTRIES SERVED

CORE SERVICES

CIVIL CONTRACTING

Our construction department can deliver maximum value on your project creating time and cost-appropriate solutions while maintaining the highest quality.

Waste Management

Select Civil owns and operates specialist waste equipment nationwide, managing over 2.4 million tonnes of waste annually across Australia.

PLANT HIRE

Select Civil own a fleet of standard & specialised waste handling & civil construction equipment for both wet & dry hire on both long and short term contracts.

PLANT REBUILDS

Expert plant rebuild and refurbishment services, providing a cost-effective alternative to purchasing new equipment, as well as bio-security wash facilities.

PROJECTS

SELECT CIVIL

AVON DAM BRIDGE REPLACEMENT

Select were engaged by NSW bulk water supplier, WaterNSW to design, demolish and replace a deteriorating public road bridge over Nepean River at Avon Dam at a cost of \$3.2mil on Upper Limiting Fee Contract arrangement. The intention was to reuse the existing mass concrete piers to minimise construction timeframe and impact to key drinking water catchment.

Select and our designers used a non-standard integrated rock anchor and transversely tensioned PSC bridge deck system to overcome site challenges and deliver on the core Contract objectives - all installed to full AS5100 Bridge Code and RMS B80 compliance.

The constraints on this project were difficulty in accessing the physical site, highly variable water levels working downstream of an active dam spillway, coordinating with NPWS and other stakeholders in completing the project to meet all priorities, and minimising impacts on water quality in the catchment. Despite the challenges, Select delivered the project to the satisfaction of all parties. For the hard work and successful outcomes on this project, Select went on to win both the NSW and Nation CCF Earth awards for excellence in construction.

PROJECTS

SELECT CIVIL

TURPENTINE ROAD UPGRADE

Select Civil was awarded two separate Shoalhaven City Council contracts to complete the Turpentine Road Upgrade works, connecting Princes Highway Tomerong to Braidwood Road, and streamlining the route from the Jervis Bay Region to Canberra. Totalling \$6.44 million, the two stages involved the upgrade and realignment of 8.3km of unsealed gravel road, shoulder widening, increased pavement quality and sealing for long term protection and increased safety to users.

Significant sub-grade material quality problems were encountered throughout both stages of the works, due to moisture conditioned slope-wash making up much of the existing road foundation. Collaboration between Council staff and the Select Civil engineering and construction team led to the design and successful installation of a Geofabric lined rock mattress, bridging over the unstable lower ground. The end result was a cost effective and stable foundation treatment that allowed for the construction of original pavement design without sub-grade heaving, deformation or failure.

Turpentine Road Upgrade Stage 2 was delivered on time, and Stage 3 three months ahead of program. Both projects were completed within Council's cost budget, and to their satisfaction.

PROJECTS

SELECT CIVIL

WHYTES GULLY LANDFILL

Wollongong City Council owns and operates Whytes Gully Resource Recovery Park, which currently receives all of the municipal solid waste within the Wollongong local government area. With existing landfill airspace at Whytes Gully Resource Recovery Park projected to expire, Wollongong City Council proposed the construction of several new landfill cells on the occupied site, on top of and adjacent to existing landfill locations. Once completed, the 4 stages of the project would extend the capacity of the Whytes Gully site by a further 6 million m³.

Select Civil engaged in a \$10.5 million contract with designer and superintendent Golder & Associates to construct the first stage of the new landfill cell construction; packages 1A and 1B. Both piggyback cells were built directly above compacted putrescible waste. The high specification cell construction consisted of coal wash and clay earthworks, polymer liner placement and welding, geosynthetics deployment, subgrade and surface pipe installation, gravel placement and surface drainage works.

The project also consisted of ancillary works including the construction of 3 asphalt roads, diversion drains, gabion drainage structures, culvert installation, subgrade gas pipe network installation, minor earthworks and buildings demolition.

AWARD WINNING

WINNERS OF 2022 CIVIL CONTRACTORS FEDERATION NATIONAL EARTH AWARDS

SELECT CIVIL

Australia's peak body for the civil construction industry, the Civil Contractors Federation (CCF), has announced the winners of the 2022 National Earth Awards.

Recognised as the most prestigious accolades in civil infrastructure, the CCF National Earth Awards celebrate excellence in civil construction across various sectors.

The winners were revealed during a Gala Dinner held on Friday, 11 November 2022, at Hotel Realm in Canberra. The event brought together 250 industry professionals to honour 47 finalists, all of whom had already won at the state and territory level.

In the \$2 million to \$5 million category, Select Civil claimed victory for their Avon Dam Road Bridge Replacement project. This achievement highlights their exceptional work in designing and constructing a new bridge along Avon Dam Road, ensuring access to Avon Dam in New South Wales.

OUR TEAM

RENAUD CHAUVET
Managing Director

20+ years in business subsidiary management, Renaud holds an MBA in International Management and a Masters of Management in Corporate Finance from the University of Dallas, Texas. Previous long-term experience in West Africa in Plant & Equipment distribution and timber industry. Renaud has been with Select Civil for 13 years.

GRAHAM PEACE
General Manager

20+ years working in civil and construction projects management, including the construction of sewerage pump stations, bulk excavation & soil treatment projects, mine rehabilitation projects, waste and waste cell construction, bridge construction and roadworks. Graham successfully managed projects in Australia, South Africa and England.

ALLAN FARRELL
Construction Manager

Allan has 20 years' experience in commercial plumbing and 15+ years in civil construction. He holds advanced plumbing certifications and has led major projects, including Avon Dam Road Bridge, Whytes Gully landfill, and sewerage plants in Berry, Vincentia, Goulburn, and St Georges Basin.

MITCH BELL
Project Manager, Business Development

Mitch has over 10 years' experience in the civil industry, with a focus on business development, Contract management and complex projects, and is involved in all aspects of project delivery. Mitch has been integral in the delivery of multiple successful road and bridge construction and upgrade projects throughout the Shoalhaven, Illawarra and Sydney region.

KILIAN JAMES
Senior Project Engineer

Kilian is a passionate and energetic project engineer, and has over 8 years' experience in civil infrastructure projects, throughout France, England, United States and Australia. With multiple faces background, including >\$1bil tunnelling projects, Kilian has learned to adapt himself to any situation, ensuring projects are delivered on time and on budget.
